TRAINING CONNECTION

USE YOUR OWN IMAGINATION

and ADOBE ILLUSTRATOR to create beautiful, colorful and exciting vector graphics.

ILLUSTRATOR 2022 ADVANCED

This 2-day advanced class consists of 12 different Real-World projects that cover the more advanced features of Adobe Illustrator.

Students should have already completed our Illustrator Fundamentals class or have equivalent experience prior to attending this class.
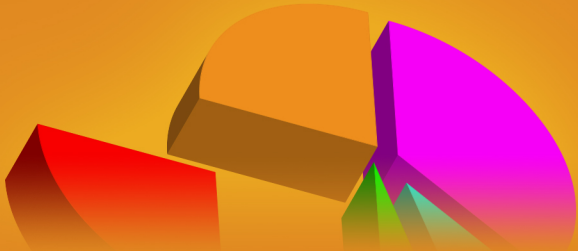

Advanced Lesson 1: Faux 3D Design

Use the powerful Appearance Panel to create a simulated 3D button--a skill that can be used to crate amazing art.

• Learn how to Work with the Appearance Panel
• Use the Gradients Panel to Create Textures
• Manage Layers and Groups for Better Design

Advanced Lesson 2: Infographics

Use Illustrator's graphing tools and other features to create infographics in 2D and 3D.

• Working with the Graphing Tools
• Gradients and Shadow Effects
• Work 3D to Enhance Graphs
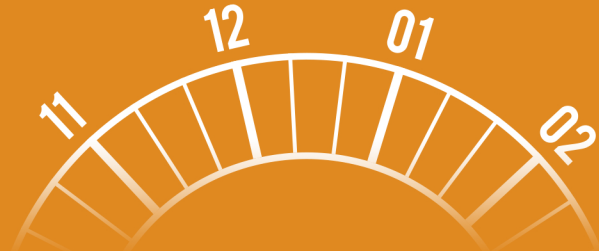

Advanced Lesson 3: Typography Art

Use several tools and techniques to create a Typography-based poster and more.

• Work with Warping Text
• Working with the Appearance Panel
• Text Tools and Techniques

Advanced Lesson 4: Image Tracing

Use Image Trace and Live Paint to turn common pixel-based art into beautiful vector masterpieces.

• Learn about the Image Trace workflow
• Use Live Paint to Add Color to Vector Artwork
• Learn about the types of Vector Art

Advanced Lesson 5: Patterns & More

Use Illustrator's amazing Pattern Maker as well as a few hidden features to create amazing repetitive artwork.

• Make Patterns in Illustrator
• Use Anchor Points and Transforms
• Use the Transform Effect

Advanced Lesson 6: Blending Modes

Use the popular Blending Modes feature to create complex blending effects on your images.
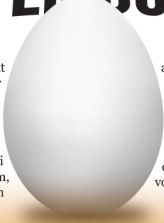

• Learn about Blending Modes
• Apply Blending Modes to your Layers
• Working with Blending Modes

Advanced Lesson 7: Text & Graphics

Learn additional methods to combine text and graphics to create a one-page info article.

- Format and connect text boxes
- Wrap text around a graphic
- Use a Gradient Mesh to create graphics

Advanced Lesson 8: Vector Brushes

Learn about the many different types of vector brushes to create some unique artwork.

- Use and define Brushes
- Add brush art to existing paths
- Create vector brushes

Advanced Lesson 9: Vector 3D Art

Use 3D Effects in Illustrator to create two very different types of 3D vector artwork.

- Learn about the Extrude & Bevel Effect
- Learn about the Revolve Effect
- Position your 3D Artwork

Advanced Lesson 10: Raster & Vector

Combine raster and vector graphic design together and learn how to manage their relationship in Illustrator.

- Learn more about raster graphics in Illustrator
- Work with the mighty Appearance panel
- Create vector elements for your raster graphic

Advanced Lesson 11: Advanced Color

Use some of the most powerful coloring features in Illustrator to alter and convert the colors of your artwork.

- Create professional color combinations
- Convert and alter colors
- Learn how to reduce colors in your artwork

Advanced Lesson 12: Perspective Art

Use the powerful Perspective Grid in Illustrator to create 3D looking perspective vector artwork.

- Learn about the Perspective Grid
- Create a perspective logo from scratch
- Manipulate elements on the grid
